EMPOWERING PUBLIC SAFETY WITH LIFE SAVING TECHNOLOGIES

Gain Valuable User Feedback and Access Early Adopters with PSN's Public Safety End User Testing

**Need first responders to test your products and solutions in an
operational field environment?**

**Want to showcase your technology with first responders and
secure early adopters?**

Introducing the Public Safety End User Testing Program

From the Western Fire Chiefs Association and
the Public Safety Network.

Gain access to a vetted group of first responders and public safety experts to test and evaluate emerging technologies and help guide the expansion of new public safety solutions.

The Public Safety End User Testing Program allows companies to obtain end user feedback at various stages of product development or enhancement:

Hands-on product testing in the field with vetted public safety experts fitting your ideal customer profile.

Customized, targeted and objective feedback on products and solutions to guide product development roadmaps.

Showcase your product and raise awareness with operational public safety technology early adopters and influencers.

**Test and improve your technology while showcasing your products
and solutions to operational public safety personnel.**

Meet the Team

Victoria Lee
Managing Director

Victoria's 30-year career in public safety includes serving as a volunteer firefighter/EMT, directing numerous internal programs and grant activities at the International Association of Fire Chiefs (IAFC), and conducting extensive public safety outreach at the First Responder Network Authority (FirstNet).

Drew Delaney
Director of Growth and Advisory Services

Drew has nearly 20 years of experience in wireless and public safety technology including Lucent Technologies, the First Responder Network Authority and now PSN. Since leaving FirstNet in 2018, he's helped launch and grow over a dozen companies and products in the US public safety market.

David Blankinship
Senior Technology Advisor

David works on technology and strategy, analytical collaborations, and curating future technology for public safety as the technology advisor to PSN and the Western Fire Chiefs Association. He also co-founded Intterra, the premier situational awareness and analytics platform in the fire service.

Rhiannon Bogozi
Operations Manager

Rhiannon's 15 years of experience in public safety began as a volunteer firefighter and EMT and included serving as a Program Coordinator for FEMA grants managing fire department recruitment and retention through marketing and training programs.
